SublimeBy Lulu34I was thrilled to finally purchase this lovely cookbook when I decided that my husband absolutely required the Neopolitan cake for his birthday. (not to mention by immediate lust to own this cookbook upon it's release) He adored his cake. The cakes themselves were tender and delicious. While I prefer a stronger chocolate flavor in my cakes, this is a personal preference, not a commentary on the quality of these recipes. The 3 accompanying buttercreams with this recipe were so very dreamy and my husband and friends could scarcely decide which combination they loved most from bite to bite. Since this cake, I have made the chocolate chip cookies and Bakewell Tart cupcakes. I have been tremendously impressed with both and my husband and I agree that my baking projects from this book are by far the most luscious, deeply gratifying baked offerings we have had.Regarding the only other review on , at present, which takes issue with the nutritive qualities of this cookbook, I feel it necessary to express that the beauty of desert is it's whimsy and delightful release from practical confinement. Mindful consumption of nutritious foods is most certainly relevant to well being but so in turn is the occasional abandon thereof. Being vegan should not alienate us from others, in excessive judgement or an unreasonable quest for ultimate "health". Ms. Cupcake seeks to make sweets for everyone and I think this fully

embraces the vegan spirit of compassionate living and consumption. 1 of 1 people found the following review helpful. Five Stars By Loretta Costa Loved this book!
