Interesting Concept For Prepping Meals By Roberta Rankin The idea of individualized servings cooked in multiples by using a muffin tin was fascinating. Although the recipes sound good (haven't yet tried them) the issues I have with this book are not with the recipes but the layout of the book. This is a compilation of 3 in 1. Unfortunately there is no index nor breakdown by main ingredient. This makes using this book more cumbersome. 0 of 0 people found the following review helpful. Cheap, poorly made By Careful\_Consumer Great cover... disappointing inside despite decent recipes that look good. No pics inside. Very poorly laid out as if I'd done it myself. Cheap. I bought it as a gift and had to go with Plan B.
