By Brendan Burke A good book chronicling a very under covered part of the new old wine world at large. This book talks about the discovery and rediscovery of great bold wine techniques. Technological wine making has been pushed to its limits and left us with a syrupy or hyper perfect enterprise class winery genre the world over. The emergence of the popular farm

to table movement has finally started to reach critical mass in the wine world with natural wine making methods. The knock on this book is the narration, at times the author reverts to a fairly median New York neurosis coupled with a subtle lightly masked vintners classism. She seems to want to make a have and have not list of wine makers based on geography that is almost apologetic and insulting to the non French wine makers. My take is this... there is a world of wine, a world of terroir; to ignore a wine from California, Croatia, or New Zealand just because of its longitude/latitude is to give in to a superstition akin to believing that stepping on a crack will break your spine. A good wine knows no history, no allegiance, no flag, it is simply the product of a great year in the life of this world. 0 of 0 people found the following review helpful. Engaging, informative and a great read! By Batya Alice presents a great story involving one of my favorite subjects -- producing fruit of the vine in a "natural" way that reflects its environment. The fact that she writes so beautifully is a bonus! This book takes the reader on a fun and fascinating journey that had me taking notes throughout. While the story came full circle and the book ended well, reading a bit whenever I could steal some time had become such a delicious part of my day that I miss no longer being in the middle of it. But at least I have new wines to try and new insights into the world of "naked" wine. Santeacute;! 2 of 2 people found the following review helpful. Good read and experiment By Robert A Never thought of the chemicals and processing that goes into making consistand wine. very much like the consistant beer productions of Bud from AB. Alice explores the natural process and makes a batch (tote) of wine with the method she's exploring. It not as heavy as Biodynamics but produces a great wine with character. My wife gets migrane headaches from sulfer, we've tried the wines she lists in the back of the book and the head aches have all but disappeared. I believe Ms. Feiring is on to something our grandparents knew along time ago

Naked wine is wine stripped down to its basics—wine as it was meant to be: wholesome, exciting, provocative, living, sensual, and pure. Naked, or natural, wine is the opposite of most New World wines today; Alice Feiring calls them “overripe, over-manipulated, and overblownrdquo; and makes her case that good (and possibly great) wine can still be made, if only winemakers would listen more to nature and less to marketers, and stop using additives and chemicals. But letting wine make itself is harder than it seems. Three years ago, Feiring answered a dare to try her hand at natural winemaking. In *Naked Wine*, she details her adventure—sometimes calm, sometimes wild, always revealing—and peers into the nooks and crannies of today's exciting, new (but centuries-old) world of natural wine.

ldquo;[A] fascinating and at times humorous book.nbsp;If you drink wine and care about what goes into your body, then this book is a must read.rdquo;
