From start to finish, got all the info I needed to make great cake popsBy ggramirezLove that she included little tricks for these, as well as ways to save money. Shows you how to make a simple cake pop and how to get creative. Easy to follow and read. I even went to her book signing, she is super nice!!2 of 2 people found the following review helpful. has some cute animalsBy Couer de pirateReally like this book but for having paid for a book to teach me how to make something I would think that it would have pictures to show you step by step but the directions do a pretty good job.0 of 0 people found the following review helpful. Splendorous!By rosario ambrose-santosVivid colors, creative figures, detailed instructions, complete lists and photos of tools and supplies...the whole book is easy to read, inspiring to follow, visually enticing and graphics and pictures are so awesome you can almost taste what you are looking at. It is indeed a sweet incredible edible journey from beginning to end. I wish there were many more pages to this book.
