Not for serious pizza cooksBy P. FiorinoThis book is a collection of recipes for weird pizzas, but offers little detail on how to make good pizza. The dough recipes are over-simplified and wrong, omitting much of the critical detail required to make excellent pizza dough. They tell you to let it rise for one hour (wrong; it should be refrigerated overnight), to roll it out with a rolling pin (wrong; it should be hand-stretched), and to bake at 425 degrees (wrong; it should be baked on a stone pre-heated at 550 degrees). If it never occurred to you that you can put barbecue chicken, kiwi fruit, chocolate (yuck) or cilantro (retch) on a pizza, this book is for you (the recipe for red, green, and yellow pepper pizza borders on silly - who knew that you can put bell peppers on a pizza, let alone THREE different colors!). But if you want a book showing how to make GOOD pizza (this book has no pictures) instead of weird pizza, look elsewhere.

For everyone who loves pizza but is tired of the same old take-out slice. For everyone who sees a round of pizza dough (whether store-bought or homemade) as a blank canvas. For everyone who believes pizza is the most delicious,

versatile, fun-to-eat food in the world. .
