James Halliday, Hugh Johnson : The Art and Science of Wine before purchasing it in order to gage whether or not it would be worth my time, and all praised The Art and Science of Wine:

2 of 2 people found the following review helpful. this is a good book for you as it gives an overview of ...By Pablo D GarciaIf you are a wine enthusiast, this book does not have new interesting information. There are some interesting pictures and comments but the book never gets into many details.If you are a beginner, this is a good book for you as it gives an overview of the wine making process and the different type of wines available.9 of 9 people found the following review helpful. Should be a standard for any serious wine loverBy mrthinkndrinkTwo industry heavyweights spell out how great wine is made, keying on the critical decisions - and their ramifications - made at every step. The specific how's and why's of grape growing: fertilizing, canopy management, crop thinning, soil types, climate differences, etc., and then on to winemaking: sulfur additions, cold soaking, fermentation vessels and

temperatures, extended maceration, aging, racking, filtering, etc., right up to and including bottling, and how each decision affects the final product. The differences in growing/making light vs. full bodied whites, reds, sparklers and dessert wines. Excellent sections on the use of oak, wine faults and more. Good stuff. Read it. 0 of 0 people found the following review helpful. Excellent Book By jeffrey o. greiner What a pleasure to read, great for study from. Easy to read accessible for layman to professional. Used it to study for My Certified Specialist of Wine Exam. Makes a lot of the subjects clear in concise writing. Put it at the top of your general+ information on wine books. Great delivery time-very happy overall with purchase, reading material, and information provide. Well worth the investment.

How wine is made, from field to cellar to bottle. Great wine is a complex blend of nature, art and science. In this updated new edition of a classic book, the "how and why" of a wine's creation are examined in detail. Acclaimed wine writers James Halliday and Hugh Johnson analyze the art and science behind the winemaking process. They start with the fundamental role of terroir the complex combination of characteristics that give a wine its personality. The latest developments in pruning and irrigation are then covered, along with the recent emergence of vineyards in cooler regions and the rise of organic wines. Wine production in the cellar is detailed for nine specific styles, from light-bodied whites to full-bodied reds, along with sweet, sparkling and fortified varieties. The authors present the choices facing vintners at every step. The science of maturation is discussed, along with the industry's raging debate over the merits of natural cork, plastic cork and screw cap seals. The book also covers: A year in the vineyard Quantity vs. quality National attitudes and regional characteristics Mechanization The chemistry and analysis of wine. The Art and Science of Wine is filled with full color photographs and illustrations. With text that reflects the latest winemaking technology and discoveries, this lively book is both accessible and highly informative.

Loaded with information ... Read this book and you'll be guaranteed to come out of it smarter. (Andy Perdue Wine Press Northwest) A superb work, masterfully done.... It's a simple formula. Take two of the best wine writers of our era and let them do a thorough analysis of the science and the art that go into every decision from the vineyard to the bottle. The result---one of the best wine books of the year. Bravo! Very highly recommended. (Bob Fraser California Grapevine) An extremely useful book for the beginning wine student, and an 'aide memoire' for the experienced hand.... Well worth the money. (Deam Tudor, Wine Writer www.deamtudor.com) One of the best overviews of the winemaking process in print today. (Wine East) [An] extensive reference ... Beautifully illustrated with over 200 full color images, The Art and Science of Wine is a great addition to any wine enthusiast's bookshelf. (Cristabelle Tumola La Cucina Italiana) This is a different kind of smart book ... rather than being about the philosophy of wine, it is about the beauty of the wine-making process. (Charles Olken Valley Times (Pleasanton CA) 2007-12-05) About the Author James Halliday is a wine critic and vigneron (vine grower) with a career spanning 30 years. He is a founder of Brokenwood and Coldstream Hills wineries in Australia, the author of more than 50 books, and a wine judge. Hugh Johnson is a world-renowned wine writer with a talent for making the science of wine easier to understand. His first book, Wine, was published in 1966 and became an international best seller. Later titles, such as The World Atlas of Wine, Story of Wine and How to Enjoy Your Wine, have been reprinted many times. He lives in Australia. Excerpt. copy; Reprinted by permission. It was last fired in 1964, when a cloud the color of a decomposing eggplant and exactly the size of the vineyards of Muligny, hanging poised above the slopes of Chassard, the next-door commune, began to roll ominously toward the Clos du Marquis. Monsieur Moutarde had towed the weapon into the vineyards behind a borrowed tractor, loaded it with a canister of grapeshot of the vintage of 1815, leveled it at the heart of the threat and plucked up his courage to apply the taper. The explosion was thunderous. Nobody in Chassard was sure whether what clattered down on several roofs was a flurry of hail or straying grapeshot. The cloud rolled on, menacing but still costive, over Muligny and three more communes before suddenly dumping its gumball-size hailstones on the scruffy oak woods on the hill above Beaune. The oaks were shredded; not a leaf was left. But in Chassard relief for the spared vines was tempered by unneighborly feelings toward Monsieur Moutarde indeed toward Muligny as a whole. The two villages had never exchanged more than civilities; not in 2,000 years. One must not put too much weight on the cannon incident; it was merely a symbol of the rivalry that had existed since the Romans. Things were different then, in the early 1960s, in several ways. For a start, nobody had any money -- or if there was any cash in the mattress it meant a harvest mortgaged to a merchant in Beaune.
